### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Abstract:

Last line after "tea powders", insert the following:

--said powders containing  $\geq 90\%$  isomaltulose as a carrier and urea in reinforcing the sweetening power of isomaltulose--

### **Examiner's Reasons for Allowance**

2. The following is an examiner's statement of reasons for allowance:

In particular, Nakazawa et al does not disclose nor teach an instant beverage powder having all the ingredients as called for in the instant claims including 90% or greater isomaltulose. Nakazawa et al, although employing isomaltulose, same is employed as an optional weigh adjusting agent and in viewing the amounts of other ingredients included in the powder would fall significantly lower than 90%. As such, there would be no motivation to include an amount of isomaltulose as high or higher than 90% as the beverage powder is essentially a gourd fruit powder with creaming syrup (milk or fat related) and optionally L-ascorbic acid. Moreover, there is no motivation to include urea in such manner as to reinforce the sweetening power of isomaltulose (see instant claim 34). In particular, Goodfriend was applied to teach the

use of urea in beverage powder but, contrary to the aforementioned sweetening reinforcement, Goodfriend teaches that its use in beverage does not alter the taste of said beverages (col. 2, lines 48-50). JP 2000-279086 provides no suggestion that the urea employed in a beverage provides sweetening reinforcement nor is same included in an amount which would inherently facilitate such result.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **Rejoined Inventions**

3. Claims 1-11 and 22-34 are directed to an allowable product. Claims 12-21, directed to a different species of product (but containing essentially the patentable elements of the allowable product of claims 1-11 and 22-34), previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and have been fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 6/9/08 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the

claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony Weier whose telephone number is 571-272-1409. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Keith Hendricks can be reached on 571-272-1401. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
